PIR SENSOR IN PROTEUS USING ARDUINO

AIM:

To write an Embedded C program for interfacing PIR Sensor using Arduino Uno and Proteus.

SOFTWARE REQUIRED:

- Proteus 8 software.
- Arduino IDE software.

PROGRAM:

```
int Status = 13; // Digital pin D6
int sensor = 12; // Digital pin D7

void setup() {
    Serial.begin(9600);
    pinMode(sensor, INPUT); // declare sensor as input
    pinMode(Status, OUTPUT); // declare LED as output
}

void loop() {
    long state = digitalRead(sensor);
    Serial.println(state);

    if(state == HIGH) {
        digitalWrite(Status, HIGH);
        Serial.println("Motion detected!");
        delay(1000);
    }
    else {
        digitalWrite(Status, LOW);
        Serial.println("Motion absent!");
        delay(1000);
    }
}
```

OUTPUT:
