

EXPERIMENT NO: 6

ARDUINO TO 16x2 LCD DISPLAY USING PROTEUS

AIM:

To write an Embedded C program to interface Arduino Uno and 16 x 2 LCD display using Arduino Uno and Proteus.

SOFTWARE REQUIRED:

- Proteus 8 software.
- Arduino IDE software.

PROGRAM :

```
#include <LiquidCrystal.h>

LiquidCrystal lcd (7, 8, 9, 10, 11, 12);

// your PWM numbers may be different

void setup() {
    lcd.begin(16, 2);
    lcd.print("put your message here");
}

void loop () {
    for (int i=0; i<13; i++)
    {
        lcd.scrollDisplayLeft();
        delay(700);
    }
}
```

OUTPUT :
